FERRAMENTA

C A T A L O G O

Finiture / Finishes

La superficie viene sottoposta ad un processo di abrasione meccanico che fornisce al prodotto un aspetto naturale. Nessun tipo di protezione preserva la superficie dal processo di ossidazione naturale.

The surface is subjected to mechanical abrasion giving the product a natural aspect. No protection has been used to avoid natural oxidation of the surface.

F00

OTTONE GREZZO
RAW BRASS NOT POLISHED

La superficie risulta lucida. Nessun tipo di protezione preserva la superficie dal processo di ossidazione naturale.

The surface is polished. No protection has been used to avoid natural oxidation of the surface.

F1

OTTONE LUCIDO NATURALE
POLISHED BRASS

La totalità della superficie viene sottoposta ad un trattamento chimico di ossidazione (bronzatura) che conferisce all'articolo una colorazione marrone scuro; viene in seguito protetta da un film di vernice trasparente che ne preserva nel tempo le caratteristiche estetiche.

The whole surface is subjected to chemical oxidation (bronzing) resulting in a dark brown colour; the surface is then varnished to keep its characteristics unaltered in time.

F2

BRONZATO
BRONZED BRASS

La totalità della superficie viene prima sottoposta ad un processo di satinatura manuale per poi essere protetta da un film di vernice trasparente che ne preserva nel tempo le caratteristiche estetiche.

The whole surface is butter finished manually and finally varnished to keep its characteristics unaltered in time.

F3

OTTONE SATIN ZAPOR
SATIN LAQUERED BRASS

La totalità della superficie viene sottoposta ad un trattamento elettrolitico di deposizione di metallo; l'aspetto della superficie risulta perfettamente lucido e riflettente; tale finitura risulta particolarmente adatta per tutti quegli ambienti ove è altissimo il problema dell'ossidazione (es. ambienti marini)

The whole surface is subjected to an electrolytic treatment of metal plating; the surface appears perfectly polished and reflecting; this finish is mainly suitable where oxidation is very strong (i.e. seaside resorts)

F5

CROMATO
CHROME PLATED BRASS

La totalità della superficie viene satinata manualmente e poi sottoposta ad un trattamento elettrolitico di deposizione di metallo; l'aspetto della superficie risulta così satinato non riflettente.

The whole surface is butter finished manually and finally subjected to an electrolytic treatment of metal plating; the surface appears silky and non-reflecting.

F6

CROMATO SATINATO
SATIN CHROME

La totalità della superficie viene sottoposta ad una prima satinatura, in seguito ad un trattamento chimico di ossidazione (bronzatura) che conferisce all'articolo una colorazione marrone scuro; viene poi sottoposta ad un processo di satinatura manuale e successivamente protetta da un film di vernice trasparente che ne preserva nel tempo le caratteristiche estetiche.

The whole surface is first butter finished after a chemical oxidation (bronzing), which results in a dark brown colour; the surface is then butter finished manually and varnished to keep its characteristics unaltered in time.

F7

OTTONE BRONZATO GRAFFIATO
SCRATCHED BRONZED BRASS

La superficie risulta lucida e protetta da un film di vernice trasparente che ne preserva nel tempo le caratteristiche estetiche.

The whole surface is butter finished manually and finally varnished to keep its characteristics unaltered in time.

F8

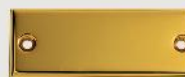

OTTONE LUCIDO VERNICIATO
POLISH LACQUERED BRASS

La totalità della superficie viene sottoposta ad un trattamento elettrolitico di deposizione di metallo e poi verniciato per preservarne nel tempo le caratteristiche estetiche; l'aspetto della superficie risulta perfettamente lucido e riflettente.

The whole surface is subjected to an electrolytic treatment of metal plating and then varnished to keep its characteristics unaltered in time; the surface appears polished and reflecting.

F12

ORO
GOLD PLATED

La totalità della superficie viene sottoposta ad un trattamento elettrolitico di deposizione di metallo; l'aspetto della superficie risulta perfettamente lucido e riflettente.

The whole surface is subjected to an electrolytic treatment of metal plating the surface appears polished and reflecting.

F15

NICHELO
NICKELED BRASS

La totalità della superficie viene prima sottoposta ad un trattamento elettrolitico di deposizione di metallo; segue poi un processo di satinatura manuale per poi in ultimo essere protetta da un film di vernice che ne preserva nel tempo le caratteristiche estetiche.

The whole surface is first subjected to an electrolytic treatment of metal plating; it is then butter finished manually and finally varnished to keep its characteristics unaltered in time.

F17

SATIN NICHELATO
SATIN NICKELED BRASS

Finiture / Finishes

F19

ARGENTO
SILVER PLATED

La totalità del manufatto viene sottoposta ad un trattamento elettrochimico di argentatura con grado di purezza 999/000 e successivamente verniciata per preservarne nel tempo le sue caratteristiche originali di brillantezza o argentea bellezza.

The whole surface is subject to an electrochemical silver treatment, with a level of purity 999/000, and then varnished to preserve its original bright features and its silvery beauty.

F20

LACCATO BIANCO
WHITE

La totalità della superficie viene sottoposta ad un processo di verniciatura; l'aspetto della superficie risulta essere di colore bianco opaco. La vernice utilizzata è un prodotto formulato con resine poliestere e particolari pigmenti resistenti alla luce.

The whole surface is varnished; the surface appears mat white. The varnish used is a mix of polyester resins and special lightproof pigments.

F23

LACCATO NERO
BLACK

La totalità della superficie viene sottoposta ad un processo di verniciatura; l'aspetto della superficie risulta essere di colore nero opaco. La vernice utilizzata è un prodotto formulato con resine poliestere e particolari pigmenti resistenti alla luce.

The whole surface is varnished; the surface appears mat white. The varnish used is a mix of polyester resins and special lightproof pigments.

F27

OIL RUBBED VERNICIATO
OIL RUBBED WITH MAT VARNISH

La totalità della superficie viene sottoposta ad un trattamento chimico di ossidazione (bronzatura) che conferisce all'articolo una colorazione marrone scuro. La superficie viene poi protetta da un film di vernice opaca che ne preserva le caratteristiche estetiche.

The whole surface is subject to chemical oxidation, brozing, obtaining a dark brown colour and later coated with a thin layer of mat varnish to keep its characteristics unchanged.

F35

ORO SABBATO
SANDED GOLD BRASS

La totalità della superficie viene prima sottoposta ad un trattamento di sabbatura e successivamente ad un trattamento elettrolitico di deposizione di metallo, infine verniciata; l'aspetto della superficie risulta essere uniformemente opaco e ruvido.

The whole surface is first sandblasted, then subjected to an electrolytic treatment of metal plating and finally varnished; the surface appears regularly mat and rough.

F37

OTTONE ANTICO
OLD BRASS

Il singolare effetto è ottenuto, associando le varie tecniche artigianali, mediante un accurato processo di tamponatura manuale discontinua più o meno intensa, per un risultato antico invecchiato nel tempo. Per risaltarne il contrasto, si effettua un trattamento chimico di "brunitura light", completando con l'applicazione di vernice elettrostatica opaca, che ne preserva le caratteristiche.

This particular effect is due to handcraft manual plugging treatment, resulting in a "spotted aged" effect. The whole surface is varnished, thanks to a mat electrostatic varnish, which protects the surface.

F41

OIL RUBBED CERATO
OIL RUBBED WITH WAX DEPOSITION

La totalità della superficie viene sottoposta ad un trattamento chimico di ossidazione (bronzatura) che conferisce all'articolo una colorazione marrone scuro; viene poi sottoposta ad un processo manuale di deposizione cera naturale che conferisce alla superficie una maggiore uniformità e nello stesso tempo fornisce una protezione al colore. Questa finitura, proprio per la naturalezza dei prodotti utilizzati è destinata a subire delle modificazioni. Nel tempo l'oggetto tende ad acquisire un naturale aspetto invecchiato.

The whole surface is subjected to chemical oxidation (bronzing), resulting in a dark brown colour; the surface is then subjected to natural wax deposition for greater uniformity and for protecting the surface colour. Due to the natural products used for this finish, the item will change in time by acquiring a more aging effect.

F44

NICHEL ANTICATO
ANTIK NICKEL

L'oggetto viene dapprima sottoposto ad un particolare processo di invecchiamento che conferisce alla superficie un aspetto usurato. La totalità della superficie viene poi sottoposta ad un trattamento elettrolitico di deposizione di metallo e ad uno successivo di ossidazione; si procede in seguito con un processo di abrasione che conferisce alla superficie un aspetto invecchiato naturale ed in ultimo si procede con la deposizione di un film di vernice opaca che ne preserva nel tempo le caratteristiche estetiche.

The item is first subjected to a special aging process resulting in a worn-out effect. The whole surface is then subjected to an electrolytic metal plating and finally to oxidation; it is then submitted to an abrasion treatment resulting in a natural aging effect and later coated with a thin layer of flat varnish to keep its characteristics unaltered in time.

F47

RAME ANTICO
ANTICK COPPER

L'oggetto viene dapprima sottoposto ad un particolare processo di invecchiamento che conferisce alla superficie un aspetto usurato. La totalità della superficie viene poi sottoposta ad un trattamento elettrolitico di deposizione di metallo e ad uno successivo di ossidazione; si procede in seguito con un processo di abrasione che conferisce alla superficie un aspetto invecchiato naturale ed in ultimo si procede con la deposizione di un film di vernice opaca che ne preserva nel tempo le caratteristiche estetiche.

The item is first subjected to a special aging process resulting in a worn-out effect. The whole surface is then subjected to an electrolytic metal plating and finally to oxidation; it is then submitted to an abrasion treatment resulting in a natural aging effect and finally coated with a thin layer of flat varnish to keep its characteristics unaltered in time.

F49

OTTONE ANTICATO
ANTICK BRASS

L'oggetto viene dapprima sottoposto ad un particolare processo di invecchiamento che conferisce alla superficie un aspetto usurato. La totalità della superficie viene poi sottoposta ad un trattamento di ossidazione; si procede in seguito con un processo di abrasione che conferisce alla superficie un aspetto invecchiato naturale ed in ultimo si procede con la deposizione di un film di vernice opaca che ne preserva nel tempo le caratteristiche estetiche.

The item is first subjected to a special aging process resulting in a worn-out effect. The whole surface is then subjected to an electrolytic metal plating per micron and then to oxidation; it is then submitted to an abrasion treatment resulting in a natural aging effect and later coated with a thin layer of flat varnish to keep its characteristics unaltered in time.

P 1

PVD
PHISICAL VAPOUR DEPOSITION

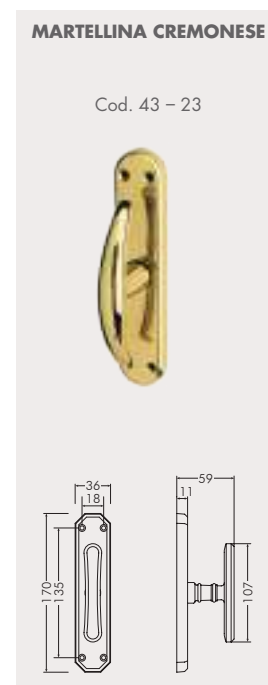

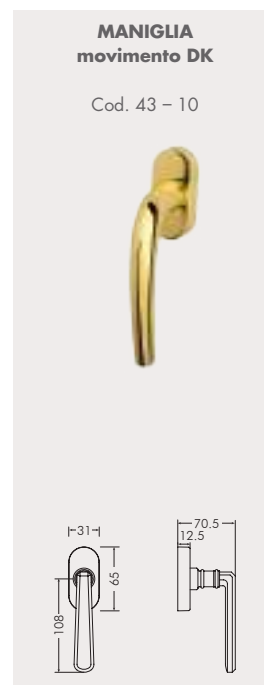

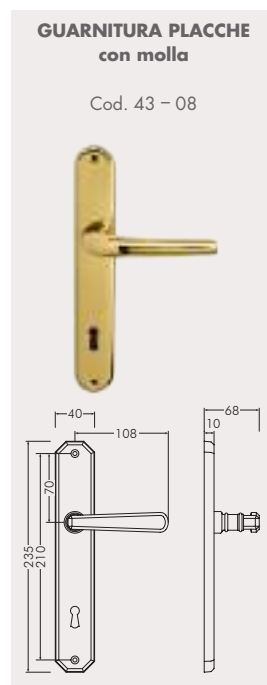

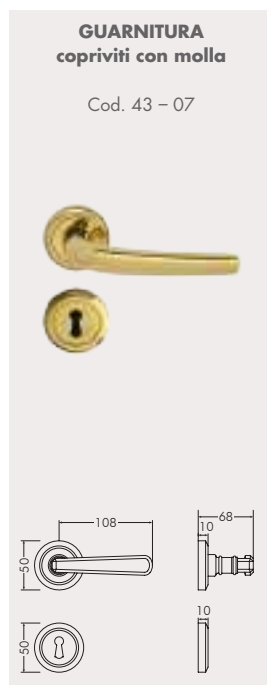

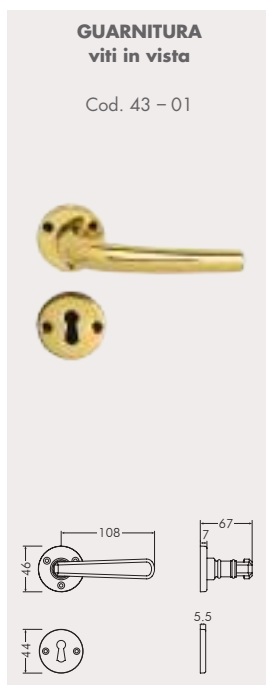

Trattasi di rivestimento particolarmente resistente agli agenti atmosferici oltre che ai prodotti utilizzati per la pulizia domestica; il principio su cui si basa tale trattamento è quello fisico dell'evaporazione sottovuoto dei metalli che, allo stato ionico, vengono fatti condensare formando un deposito su un substrato, dopo aver reagito con un gas e formato così un composto.

This is a special coating for protection against atmospheric agents and domestic detergents; this treatment is based on the physical principle of vacuum metal evaporation, which, at a ionic state, condense by forming a deposit on a substratum after reacting with a gas and thus forming a compound.
